# Nature's Miracle Fibre

---

## 100% Sustainable

Wool is a 100% sustainable and renewable fibre.

## Can help regulate humidity

Wool absorbs moisture when the atmosphere is damp and releases it when the atmosphere is dry, creating a more comfortable environment that's warmer in the winter and cooler in the summer.

## Non allergenic

Wool carpets naturally absorb and filter airborne volatile organic compounds (VOCs) - unwanted toxins and odours that can cause irritation.

## Noise insulation

Noise pollution can impact on your health, comfort and productivity. Wool carpet helps to improve the acoustics of busy spaces, absorbing sound and softening the volume.

*What makes our carpets  
unique?*

---

# Farm gate to floor

---

Our wool comes from New Zealand farms. Sheep are raised on fertile open pastures, in a climate ideally suited to growing **clean white wool** of exceptional quality.

From this natural, biodegradable product, we stock dye the fibre to deliver superior colour performance. The fibre is then processed to become **warm luxurious** wool carpet.
